

# JENNIFER SMITH

Broida Hall University of California Santa Barbara  $\diamond$  Santa Barbara, CA 93106

(+1) 206-715-4133  $\diamond$  jennifer.smith@ucsb.edu

## EDUCATION

---

### University of California, Santa Barbara

Fifth Year Ph.D. Student

Department of Physics

*September 2018 - Present*

Overall GPA: 3.7

### Harvey Mudd College

Bachelor of Science, Physics

Graduated with high distinction

*August 2014 - May 2018*

Overall GPA: 3.7

## RESEARCH EXPERIENCE

---

### University of California, Santa Barbara Department of Physics

*Graduate Research*

*Microwave Kinetic Inductance Detector Readout*

July 2018 - present

*Santa Barbara, CA*

- Designing high-speed MKID readout on Xilinx RFSoc platform using Vivado HLS, MATLAB/Simulink, and Vivado, to decrease weight, volume, and power of readout electronics.
- Writing Python drivers and control program using PYNQ framework to simplify device setup and data taking operations.
- Designing radio frequency packaging for integration of quantum-noise-limited parametric amplifier to improve detector performance.
- Designed, fabricated, and tested new superconducting cable yielding improved instrument performance.

### City of Hope Cancer Research Hospital

*Harvey Mudd College Clinic Program*

*Surface Enhanced Raman Spectroscopy (SERS) for Breast Cancer Detection*

Aug 2017 - May 2018

*Claremont, CA*

- Worked with a team of four engineering students to design, simulate, and prototype a system capable of detecting breast cancer in real time during surgery.
- Used scanning electron microscope to characterize different SERS substrates.
- Tested SERS substrates on model tissue using 785nm raman system.
- Used sputter-coater and 3D printer to create gold coated fiber optic compatible with Raman system.

### University of Washington Center for Experimental Nuclear Physics and Astrophysics (CENPA)

*NSF Research Experience for Undergraduates (REU)*

*Axion Dark Matter eXperiment*

May 2017 - Aug 2017

*Seattle, WA*

- Performed noise temperature calibration on ADMX receiver chain using the Y-factor (hot-load) method and spectrum analyzer.
- Installed and biased Low Noise Factory (LNF) amplifier and measured S-parameters using a network analyzer.
- Machined mounting stages, wired liquid-He cryogenic test-dewar, and performed 4K LNF amplifier measurements with spectrum analyzer and network analyzer.
- Characterized and installed new radio frequency components in the Superconducting QUantum Interference Device (SQUID) housing in the ADMX experiment.

**SLAC National Accelerator Laboratory**

May 2016 - Aug 2016

*DOE Science Undergraduate Laboratory Internship**Noise Characterization and Elimination in a Microwave**SQUID Multiplexing CMB Readout System*

Menlo Park, CA

- Performed noise power spectral density measurements and analysis on a microwave SQUID multiplexing system using homodyne setup and oscilloscope.
- Wrote MATLAB code to create power spectral density plots and identify noise sources.
- Wrote Python program to remotely control function generator.
- Designed and manufactured magnetic shield for SQUID module and copper heat strap for cryogenic system.

**Harvey Mudd College Department of Biochemistry**

May 2015 - Aug 2015

*Summer Research Fellow**Human 8-Oxoguanine Glycosylase as a Risk Factor for Cancer*

Claremont, CA

- Optimized DNA Glycosylase biological assay with new laser imager and IR-Dye label.
- Discovered and corrected flaws in previous work through detailed sequence data analysis.
- Collected and analyzed protein kinetics data through biochemical laboratory procedure.
- Performed safety inspections as student lab safety officer.

**WORK EXPERIENCE**

---

**Maybell Quantum Industries**

Jan 2022 - Present

*Research and Development Consultant*

Denver, CO

- Advising Maybell team on next steps to commercialize superconducting cabling technology for quantum computing industry.
- Using 3D E&M Solver (HFSS) to simulate alternate connectorization schemes to improve performance.
- Performing calibrated measurements using Dilution Refrigerator and VNA to evaluate prototype cable performance.

**Xilinx Inc. - PYNQ Team**

May 2021 - August 2021

*Internship*

Santa Barbara, CA

- Created first open-source example demonstrating 100 Gigabit Ethernet internal and external loop-back using the Xilinx Integrated 100G Ethernet Subsystem on an RFSoc.
- Tested and verified new Xilinx Run Time (XRT)-backed memory allocation technique in preparation for upcoming PYNQ image release.
- Packaged example tutorial and published blog post to help researchers in other fields leverage RFSoc devices for high-speed data applications.

**PEER-REVIEWED PUBLICATIONS**

## OUTREACH AND MENTORSHIP

---

**UCSB Womxn in Science and Engineering - Outreach Officer** September 2021 - Present  
*University of California, Santa Barbara*

- Coordinating and consolidating outreach opportunities for graduate women in science and engineering.
- Co-organized quarterly trivia and bagel hour to foster community.
- Co-reviewed applications and selected finalists for Decolvenaere Research Accelerator Award (\$7,000) and Karl Storz Research Accelerator Award (\$7,000).

**UCSB Physics GradLife - Social Officer** June 2019 - Jan 2022  
*University of California, Santa Barbara, Department of Physics*

- Planned and organized department events to foster positive department culture including game nights, Halloween costume contest, and department-wide talent show.
- Created flyers and pamphlets for events and crafting creative department-wide emails.
- Organized weekly graduate student happy hour (HBar).

**University of California, Santa Barbara Women in Physics - Officer** Oct. 2018 - Jan 2022  
*University of California, Santa Barbara, Department of Physics*

- Organized department-wide brunch to discuss issues surrounding women in physics.
- Led Women in Physics visit day panel event.
- Led weekly lunches with Women in Physics members to foster inclusive community.

**PYNQ Bootcamp - Technical Advisor** June 2021  
*Xilinx University Program*

- Served as technical advisor for middle-school students participating in hackathon featuring PYNQ boards.
- Sat on women in technology panel discussion.

## TEACHING EXPERIENCE

---

**School for Scientific Thought - Lead Instructor** March 2022  
*Center for Science and Engineering Partnerships*

- Designed and taught course on space engineering concepts to advanced local high school students.
- Produced course introductory video and materials for students.
- Guided students through rocket design challenge and introduced college-level computer-engineering concepts.

**Summer Institute in Math and Science Scholars Program - Lead Instructor**      June 2019 - Sept. 2019

*Center for Science and Engineering Partnerships*

- Designed and taught highest level math and physics course to incoming UCSB freshmen to help prepare them for success in technical majors at UCSB.
- Presented my own research and mentored students on how to get involved with research opportunities on campus.

**School for Scientific Thought Program - Co-Instructor**      Oct. 2018 - Dec. 2018

*Center for Science and Engineering Partnerships*

- Worked with five physics graduate students to designed summer physics program for advanced local high school students.
- Taught astrophysics and space mission engineering concepts culminating in egg drop challenge.

**Department of Physics - Teaching Assistant**      Sept. 2018 - June 2019

*University of California, Santa Barbara*

- Assisted students in programming and debugging a Raspberry Pi embedded system using Unix and Python.
- Helped students interface with their Raspberry Pi's using basic circuits including jumper cables, breadboards, and sensors.

## SELECTED CONFERENCE PRESENTATIONS

---

**The 30th IEEE International Symposium On Field-Programmable Custom Computing Machines**      May 2022

*New York, New York*

- Presented "Highly-Multiplexed Superconducting Detector Readout: Approachable High-Speed FPGA Design" to conference attendees.
- Ran "RFSoc PYNQ Custom Superconducting Detector Readout" interactive demo at conference demo night.

**Xilinx What's New in the Labs**      August 2021

*Virtual*

- Presented "RFSoc-PYNQ for Custom Scientific Instrumentation" to Xilinx technical executives.

**CASPER Workshop**      May 2021

*Virtual*

- Presented "A High-Throughput Oversampled Polyphase Filter Bank on a RFSoc" to conference attendees.

**Low Temperature Detectors**      July 2021

*Virtual*

- Presented "Designing the Next Generation UVOIR MKID Readout on RFSoc Devices" to conference attendees.

**APS March Meeting**      March 2021

*Virtual*

- Presented "Flexible Coaxial Ribbon Cable for High-Density Superconducting Arrays" to conference attendees.

## AWARDS AND HONORS

---

Zonta International Amelia Earhart Fellowship Award, Spring 2021

NASA Space Technology Research Fellowship, Fall 2019-Present

UCSB Physics Department Service Award, Spring 2019 - 2020

SCIAC All-Academic Team, Fall 2016-2017

Dean's List, Spring 2015-Spring 2018

HMC Department of Chemistry Stauffer Fellow, Summer 2015
